

IN THE SPECIFICATION

Please replace the paragraph beginning at page 1, line 23, with the following rewritten paragraph:

These traditional therapeutic agents for motility disorder of gastrointestinal tract have been screened on the basis of improving potential for stomach motility, more specifically on the basis of contracting activity at ~~pyloric part of stomach~~ gastric antrum by animal experiments, and clinical efficacy thereof has been confirmed by improving effect on delayed gastric emptying.

Please replace the paragraph beginning at page 5, line 12, with the following rewritten paragraph:

WO96/36619 and JP-A-10-212271 disclose that a compound (1) has activity to contract ~~pyloric part of stomach~~ gastric antrum. On the contrary, the present inventors have found, by "~~Barostat test in dog~~"[,], "Barostat test in dog," that a compound (1) has an excellent alleviating activity on gastric ~~accommodation~~ accommodation, that is not stomach contraction but relaxation of gastric fundus. By virtue of such activity, symptoms, including early satiety and bloating, can be alleviated significantly by administration of a compound (1) or an acid addition salt thereof.
